

Turn-Key Solution to add Home Sleep Testing to Your Organization

Millennium Sleep Lab's HST management program is designed to provide the testing logistics, including device and data management, for your medical group or sleep clinic.

MSL's program includes the following services for a multi-night, 7-channel home test:

- Scheduling patients
- Exclusive allocation of **Philips home testing equipment**
- Insurance on equipment
- Device consumables
- Configuring and Calibration of devices
- **Delivery of devices**
- **Personal education of patient on use of equipment**
- Tracking of devices
- Collecting of devices
- Uploading data
- Cleaning of devices
- **Scoring of data by RPSGT**
- Web access to Millennium HST management software.
- Generation of customized reports

Additional services available include:

- Interpretation by board certified sleep physician.

Your medical group or sleep clinic will global bill 95806 (technical and professional component) for portable sleep studies under your contracts with insurance companies. Millennium HST will invoice group or clinic monthly for contracted services of each test performed.

Millennium Sleep Lab's focus on quality service and patient care ensures sufficient data for diagnosing your patients and maximizes the nights/patient you can bill.
